

## SOFTWARE:

The image shows a Windows 10 desktop environment. A Python IDE window is open, displaying a script named 'jf.py' located at 'C:\Users\Welcome\AppData\Local\Programs\Python\Python310\jf.py (3.10.7)'. The script contains three lines of Python code: `i="jenisha"`, `print(i[3])`, and `print(len(i))`. The IDE window has a menu bar with 'File', 'Edit', 'Format', 'Run', 'Options', 'Window', and 'Help'. The Windows taskbar is visible at the bottom, featuring the Start button, a search bar, and several pinned application icons including a web browser, file explorer, calendar, and email. The system tray on the right shows the date and time as '02-11-2022 22:42', the language as 'ENG', and the weather as '25°C Cloudy'. The cursor is positioned at the end of the first line of code in the IDE.

```
jf.py - C:\Users\Welcome\AppData\Local\Programs\Python\Python310\jf.py (3.10.7)
File Edit Format Run Options Window Help
i="jenisha"
print(i[3])
print(len(i))
```
